

No one is advocating censorship when we ask for standards of decency to be raised. Our Founding Fathers did not intend to protect the rights of the lowlife of America to communicate pornography and the likes. Why else would there be LAWS against adultery and fornication that are still on the books in some places today. No! Free speech referred to the right to share political opinions and religious beliefs that may not be popular. I can't believe that there are so many ignorant people who believe that free speech means you can curse on tv or even show virtual child pornography. With something like virtual child pornography on the internet, you only get some perverts all hot and bothered and they are compelled to find a child to rape to get the releif they seek. How can our decent country back that kind of behavior under the pretense of "free speech?" I feel so oppressed by our leaders' behavior when such a situation is left in place to protect these evil people.
